

Managing Vendors

- | | |
|--------------------------|---|
| <input type="checkbox"/> | Consider fitting vessel with remote diagnostic tools or seek out verbal guidance for solutions prior to allowing a vendor on board. |
| <input type="checkbox"/> | Disinfect any equipment or tools prior to bringing on board. |
| <input type="checkbox"/> | Screen any vendors for fever, respiratory symptoms or high risk contact in the prior 14 days. |
| <input type="checkbox"/> | Vendors should wear masks and face shields on board. |
| <input type="checkbox"/> | All vendors and crew should practice social distancing. |
| <input type="checkbox"/> | Use radios or microphones for communication in loud environments - do not yell! |
| <input type="checkbox"/> | Keep engine room fans running, even at the dock. |
| <input type="checkbox"/> | Minimize the number of times a vendor enters and leaves the vessel - have them plan to bring everything on board at one time. |
| <input type="checkbox"/> | Vendors must wash hands or use hand sanitizer every time they enter or leave a vessel. |
| <input type="checkbox"/> | Gloves should be discarded or washed after use. |
| <input type="checkbox"/> | Vendors should bring their own tools and not use onboard tools. |
| <input type="checkbox"/> | If vendors use onboard tools they should be disinfected prior to and after use. |
| <input type="checkbox"/> | After vendor leaves, disinfect ship and all crew wash hands. |
| <input type="checkbox"/> | Any runners, or those delivering supplies to a vessel should be educated on social distancing and cough and hand hygiene protocols. |
